VITAL VISION NEWS

In May, VitalChek staff came to Jacksonville to begin the first round of testing on the VitalVision system. State office staff worked in conjunction with VitalChek staff on testing various components of the Birth Registration and the Application for Service (AFS) modules. It was decided to postpone further testing of the system until certain modifications could be made to the birth module.

The new User Acceptance Testing (UAT) will begin in September 2001 on the birth registration module and the AFS module. State office staff will resume the testing of records in the VitalVision system. Based on the results, modifications will be made by Vision, followed by re-testing of the components.

Chief Deputy Registrar Advisory Committee (CDRAC) members will come to Jacksonville in November for training on the birth and AFS modules. CDRAC will be actively involved in the training of their respective counties as well as their surrounding counties.

In December, Chief Deputy Registrars (CDRs) will travel to Jacksonville in groups of 12 for hands-on training on the birth and AFS modules. This training is to provide everyone with a working understanding of the VitalVision system. It will give everyone the opportunity to see why we are so excited about where we are going.

Vision—(Continued on page 2)

CHIEF DEPUTY REGISTRAR ADVISORY COMMITTEE (CDRAC)

In addition to the monthly statewide calls with all CDRs, the CDRAC group has had a couple of conference calls since the last update. Members are now gearing up for Vision implementation.

CDRAC members anticipate the upcoming November 2001 VitalVision training with the State Office staff in Jacksonville. After our training, we will be given the “go ahead” to begin training the hospitals in our counties. Arrangements are being made to work out the details of the locations, time needed and appropriate class sizes for the training.

Other CDRAC discussion topics have included printers, security paper and one of the main concerns of the committee – how the new system will affect us regarding workload, staffing and classifications. The Vital Statistics Staff Functions memo, distributed before the statewide conference call in April, has helped to

Yvonda Hedrick,
Licensed Midwife

OUR “GUEST” TO YOU

Florida has been registering or licensing direct-entry midwives since 1931 (“Direct-entry” midwives are not required to obtain a nursing degree prior to their 3 year midwifery educational programs). Currently, there are 100 **licensed midwives** actively practicing in Florida. This is a 3 fold increase from 5 years ago.

Licensed midwives provide quality prenatal and postpartum care, as well as labor and delivery services, to hundreds of families throughout the state. Florida’s licensed midwives deliver the

vast majority of all babies in the state who are born at home and approximately half of babies born in birthing centers. In 1999, this accounted for approximately 850 home born, 325 birthing center born and 315 hospital born babies under the supervision of a licensed midwife.

As more midwives are licensed yearly and parental awareness of out-of-hospital birth options increase, each Florida county should experience small annual increases in their numbers of new citizens being born outside of medical institutions. Statistics indicate that more and more Florida families are choosing out-of-hospital birth each year. Fortunately for them, Florida’s licensed midwives will be there to offer them the perfect combination of art and science. Investigate your county for Florida’s best kept secret in maternity care and support your local midwife!

ISSUANCE OF BIRTH RECORDS FROM STATE DATABASE

When accepting applications from clients for birth certifications, please be mindful of the years available for issuance from the state database:

- 1963 to present
- 1946 & 1947
- 1930 to 1939 (effective April, 2001)

The balance of the 1940s (1940-1945, 1948-1949) should be available for certification from the database in September 2001. We expect to have the 1950s available on the database sometime next year.

With the implementation of VitalVision, as we have discussed during several conference calls, all local file copies for years available on the database should be destroyed according to department destruction policy. With Vital Vision, the data elements shown on the "book copies" will now be shown on the computer certification, thus eliminating the need for two types of copies. If the record is available from the database, that should be the only certification issued.

If you have questions regarding certification, contact Priscilla Smith at (904) 359-6900, ext. 1004 or SunCom 826-6900, ext. 1004.

CLERKS CORNER

Jim Ballard, Current Registration, represented Vital Statistics at the Clerk of Courts Conference in April. Mr. Ballard gave a presentation on the new electronic vital records registration system known as VitalVision. This system will be used for all vital records registration, including Marriages and Dissolution of Marriage Reports.

VitalVision is web based and, through strict security, will allow registered users to log on through their local internet provider and enter the data directly into the state database. Once the record is complete, the system will validate and assign a state file number, eliminating the need to mail paper records to the state office.

Once the clerk's office becomes a registered user they will have access to all records from their county in the Vital Statistics database dating back to the late 1970's. Currently, we are working with some of the larger counties that already have a database system in use to send vital statistics a data file tape to upload in to VitalVision.

The state office plans on testing the clerks' module of the system in March 2002 and going productional shortly thereafter. If you have any questions regarding this process, please contact Kenneth Higginbotham, Current Registration at (904) 359-6900, ext. 1017.

HOW IMPORTANT IS TIME?

- ✓ To realize the value of ONE YEAR, ask a student who failed a grade.
 - ✓ To realize the value of ONE MONTH, ask a mother who gave birth to a premature baby.
 - ✓ To realize the value of ONE WEEK, ask the editor of a weekly newspaper.
 - ✓ To realize the value of ONE HOUR, ask two lovers who are waiting to meet.
 - ✓ To realize the value of ONE MINUTE, ask a person who just missed their plane.
 - ✓ To realize the value of ONE SECOND, ask the person who just avoided an accident.
 - ✓ To realize the value of ONE MILLISECOND, ask the person who won a silver medal at the Olympics.
- Time lost will never be regained. Yesterday is history. Tomorrow is a mystery. Today is a gift.

Author Unknown

Vision—(Continued from page 1)

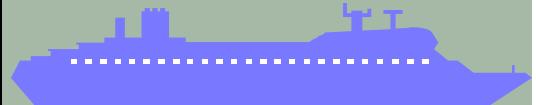

We have been talking about this system for so long that it's hard to believe we are almost at the bewitching hour! Many months of meetings, planning, reworking, strategizing, and, yes, a bit of assuming and guessing have gone into the development of VitalVision.

Even after we are up and running, we will continue to tweak the system, working for even better efficiency and usability.

We look forward to the challenges of making Florida's VitalVision, what we hope to be, on the forefront of vital records registration. There are several states involved in similar processes, Alaska, Michigan, and Ohio, just to name a few. Everyone will be focused on Florida and we expect to be an example of how a good system becomes the best!!

Anyone with questions on Florida's VitalVision system can contact Ken Jones, Deputy State Registrar at (904) 359-6982 or SunCom 826-6982.

Welcome Aboard

The following appointments have been made to the position of **Registrar**:

Local Registrar

Ken McCall Bradford County
Shakra Z. Junejo, MD Franklin County
James J. James, MD.....Miami-Dade County

Chief Deputy Registrar

Susie Cook Suwannee County

VERIFICATION OF PHYSICIAN SIGNING DEATH CERTIFICATE

The State Office of Vital Statistics along with District Medical Examiners have noticed some funeral establishments and direct disposers are not verifying who is the appropriate physician to complete the medical certification of cause of death. It is the funeral director/direct disposer's responsibility to complete the burial-transit permit in its entirety and to insure the information entered has been properly verified and is correct.

The funeral director/direct disposer is charged with the responsibility of contacting the physician in charge of the decedent's care and verifying that the physician will, in fact, complete and sign the medical certification of cause of death. When contacting the physician, the funeral director/direct disposer should ask three questions:

1. Will the physician complete and sign the medical certification of cause of death?
 2. Was the death of natural causes, there was no accident or other external cause of death that must be reported to the medical examiner pursuant to s. 406.11, F.S.?
 3. Will the physician be available to certify the death record within the 72 hour time limit prescribed in s. 382.008(2), F.S.?

After contacting the physician, the funeral director/direct disposer should complete Part A, item 5 of the Burial-Transit Permit. Section 382.026(1), F.S. requires the funeral director to attest to the fact that he/she has contacted the appropriate medical authority and that either the physician or medical examiner will sign and complete the medical certification of cause of death. Section 382.026 (1), F.S. states, "...any false statement in a certificate, record, or report required by this chapter...commits a felony of the third degree..." Failure to comply puts the funeral director/direct disposer in a situation of noncompliance which could result in the filing of an administrative complaint and possible administrative fine of up to \$1000 to be levied against the funeral director/direct disposer.

Section C of the permit, Authorization for Cremation, Dissection, or Burial-at-Sea, facilitates and documents the proper authorization by the medical examiner for final disposition . Section 406.11(1)(c), F.S. requires the investigation of every death that is to be cremated, dissected or buried at sea. The medical examiner may take jurisdiction of the case or may ask to have the decedent brought to the medical examiner facility for a visual inspection before granting authorization.

As licensed professionals, the funeral director/direct disposer is required to follow the law as stated in chapters 382 and 470 , F.S.. Working together, we can maintain an excellent system of death registration, death investigation and provide the best possible service to the families of the decedents placed in your care.

CDRAC—(Continued from page 1)
answer many of our questions.

BITS 'N PIECES

- ◆ Attention: **preparers of birth and death records**—there should be no corrections to records, i.e. no whiteout, erasures or alterations. These are legal documents and any alteration can put the integrity of the document in question, possibly resulting in delays for the family and a violation of s. 382.026(2) F.S.
 - ◆ Questions from other agencies or external customers regarding **research studies or statistical data requests** should be directed to the Statistical Unit, Gary Sammet at (904) 359-6900, ext. 1053 or SunCom 826-6900, ext. 1053.

Congratulations to
Sarasota County
for winning the county
PRO award for
100% accuracy in
Vital Records Registration
for 2000.!!
